

# Mudassar Khani

## Senior PHP Developer

With 10+ years' experience, I'm a Senior PHP Developer with Laravel, Codeigniter, Symfony, OpenCart, and Yii expertise. Currently in ReactJS, I build scalable, responsive web apps and optimize performance. A collaborative problem-solver, I deliver high-quality code that meets business objectives and exceeds user expectations

## Experience

### Since March 2023

Digi Lynx (Ltd), Islamabad

### Team Lead | Full Stack Development

In my role as Team Lead at Digi Lynx IT Solutions, I've transitioned from being a Senior PHP Developer. Now, I not only analyze project requirements but also handle estimates and task breakdowns. My responsibilities also include maintaining and enhancing our SaaS solution for the travel and tourism industry. Alongside routine maintenance, I lead plugin development and widget creation and craft libraries to boost performance and enrich functionality. From Shopify to Prestashop, WordPress to Faire Integration I have architected solutions for all platforms.

### 2022 - 2023

Land in Sicht, Black Forest Germany, (Remote)

### Senior PHP Developer

As a Senior PHP Developer at Land in Sicht, I played a key role in maintaining and improving their SaaS-based solution for the travel and tourism industry. Working on routine maintenance tasks, plugin development, and widget creation, I also wrote libraries to optimize performance and enhance functionality. My focus was on delivering high-quality code that ensured seamless website rendering for over 2000 clients who used the custom solution. Additionally, I collaborated with cross-functional teams to identify and implement new features and functionalities that met the evolving needs of the industry.

### 2020 - 2022

Carbonic IT Solutions, Islamabad

### Lead PHP Developer

As the Lead PHP Developer at Global Shopaholics, I was responsible for managing and developing our comprehensive warehouse management system and shipping solution, which also included CRM and ERP functionalities. Overseeing a team of developers, I spearheaded the development, implementation, and maintenance of the system to ensure maximum efficiency, accuracy, and customer satisfaction. My role involved collaborating with cross-functional teams, managing project timelines and budgets, optimizing performance and scalability, and ensuring seamless integration with third-party platforms.

### 2017 - 2020

AT TECH (Pvt) Ltd, Islamabad

### Lead PHP Developer

Working on DrIQ, the lead product of the company, I engineered a solution for making a digital triage by making a Pathway builder helping the medical professionals to create and implement their own decision trees for Triage Questionnaire and data collection from the patients. Also I helped in improving the performance of the current system by optimizing databases and query structures and implementing Redis server and Laravel Supervisor. I too worked in the product documentation process and the framework used to help new recruits plug in to the system and start working.

## Experience

**2016-2017**

Origami Studios (Pvt) Ltd, Lahore

### Lead PHP Developer

Working at Origami Studios I learned a lot and had an opportunity to work on enterprise level projects. I architected the entire solution to objectiveZero and GetDeclared which are leading application in US for Army Vets and University students respectively. Also I learned to work on Server management, SSL certificates, AWS and Docker management. Got a good understanding of Node APIs and Server less architecture. Transitioned from Laravel 4 to Laravel 5 and also worked in VueJS

**2015-2016**

Cozmuler (Pvt) Ltd

### Senior PHP Developer

At Cozmuler I worked as senior php developer and used my knowledge from Souq and Dubizzle to create a classified listing website rulgaye.pk, which is the first Pakistan based classified Ad posting website. Also I got a chance to work on some modules of Pak wheels which is the biggest automobiles sales and listing website. Technologies I worked on were;

- Laravel 6, Codeigniter 3, Payment Gateways Integration
- MySQL, PostGres
- VueJs,, Bootstrap, HTML/CSS

**2014-2015**

Souq.com , Dubai

### PHP Developer

At Souq I worked on Payment gateways integration, Ad managers, Custom Ad creation, Dynamic Ad posting module. Dynamic menu builders, Dynamic Form builders. Learned Wordpress Codecs and how to migrate wordpress codecs in custom development. Following technologies were used;

- Wordpress, Laravel, Codeigniter, PHP 5.6
- MySQL, Postgres
- HTML / CSS / Bootstrap

**2012 - 2015**

Dubizzle, Dubai

### PHP Developer

Back then Dubizzle was just a free classified Ad posting website. I worked on the real estate Ad listing module along with Bedspaces and apartments and condos. Technologies used

- Codeigniter 3, Symfony 3
- MySQL, sqlite
- HTML / CSS / Bootstrap
- JavaScript, JQuery
